---------------------	-------------------------	---------------------------------	--------------------	--------------------------

The San Diego County Office of Disaster Preparedness has a video lending library with numerous videos on emergency/disaster preparedness that are available for loan at no cost to the public. Details for borrowing videos are listed at the end of this document.

1 (A, B, & C)	Earthquake	17:00	Before It's Too Late	Focuses on three aspects of school earthquake management: nonstructural hazards, disaster response (stressing that schools might have to take care of children for days following a devastating quake), and emotional trauma. It shows what actually happened at schools that experienced earthquakes in Los Angeles and Coalinga, and emphasizes that "California law will hold school boards which did not prepare for earthquakes liable for injuries and suffering they could have prevented." Source: UCLA Extension 1989

Video Number	Subject/Category	Video Length (min./sec.)	Video Title	Video Description
2	Earthquake	15:00	While There's Still Time: Preparing Your School for an Earthquake	Highlights model planning and preparedness at a variety of schools and shows how the process can be broken down into manageable steps involving gaining commitment of individuals, and implementing those plans. Further, the video demonstrates that this planning process and its outcome will not be the same for each school, and that many needs can be filled using existing resources, volunteers, and donated materials. It also suggests that students themselves should be involved in the response and recovery processes. Source: UCLA Extension 1990
3	Earthquake	43:00	Earthquake Preparedness in Schools	Covers the various planning steps in developing an earthquake preparedness plan. Addresses education of students; duck and cover; supplies; assembly areas; damage assessment; search and rescue; communications; drills; student release teams; etc. Source: City of Huntington Beach - Fire Department and Emergency Services Office.

4	Earthquake	26:00	An Earthquake Preparedness Plan You Can Live With	A Montessori Elementary School shares various aspects of their plan including Duck, Cover and Hold instructions and drill; assembly areas; and emergency supply storage. Source: Maria Montessori Elementary School.
5	Earthquake	32:00	Pre-School Earthquake Conference	Dick Andrews, earthquake specialist, speaks at a 1987 pre-school conference, "Earthquake: Building a Plan". He talks about the probability of major earthquakes occurring in California. He provides insight to understanding recurrence intervals, geodetic measurements and seismicity patterns. Surveys the resulting problems after an earthquake, i.e. injuries, transportation, fire, etc. Good for introduction to faultline history and for inservice. Good content, audio-visual quality below average. Source: City Of Irvine 3/21/87
6 (A & B)	Earthquake	21:23	What Every Child Care Provider Should Know <i>(English and Spanish language versions available)</i>	Earthquake preparedness procedures for childcare centers and pre-schools. Source: Bay Area Regional Earthquake Preparedness Project (BAREPP) 1992

7 (A & B)	Earthquake	13:00	Reducing Nonstructural Earthquake Damage: A Practical Guide for Schools	A practical guide for schools in reducing non-structural earthquake hazards. A shake table test in Japan is used to demonstrate the damage to nonstructural hazards. Shows how to secure shelves, cabinets, gas cylinders, shelf contents, windows and water heater. Shakes you into wanting to bolt everything down. Source: Bay Area Regional Earthquake Preparedness Project
8	Earthquake	:55	Duck, Cover and Hold Drill Message	Doug Adams, San Diego City Schools and Zola Hansen, County Office of Education, demonstrate Duck, Cover & Hold. 1998
9	Earthquake	6:30	Be Brave: Earthquake	Narrated in English. Blossom the Clown pantomimes... What makes earthquakes shake; objects falling and duck/cover. Emphasizes: Be brave during quake. A cute production with simplified information for young children. Excellent visuals. Does not follow Los Angeles Unified Schools' drop and hold procedures. Source: KYOU-TV, Santa Ana, California 1986

10 (A, B & C)	Earthquake	5:22	Yogi's Earthquake Preparedness	Yogi teaches children about earthquake preparedness. He talks about before, during and after a quake. Emphasis is on family emergency planning, neighborhood safety watch program and being prepared at school. Mentions drop and cover procedures. Cute presentation, motivational for young children. Source: Hanna-Barbera Productions 1986
11 (A & B)	All Disasters	20:00	Adventures of the Disaster Dudes	The imaginary adventures of three young friends help them learn how they can get ready for a disaster. The video is divided into 3 segments to help guide a discussion about disaster preparedness with children in the 4th - 6th grades. Source: FEMA 1993
12	Tsunamis	9:00	The Wave - A Japanese Folktale	This video is for young children and shows storybook-type pictures, along with narration, about a young boy who learns the importance of staying far away from the ocean after an earthquake. Source: Film Associates of California 1988

13	Flood	26:00 14:30	No Way Out Danger! Debris Flow	Combines dramatic news footage, stirring personal accounts, and insightful commentary to raise awareness about the potentially life-threatening hazards of flooding. (1997) Explains danger of flash floods and debris flows in mountain canyons. Explores California's fire-flood relationship as survivors give stirring personal accounts. (1995) Source: L.A. Co. Office of Education and L.A. Co. Dept. of Public Works. Recommended for classroom use: Grades 4-12.
14	Fire	25:00	The Smoke Detectives	Four elementary-school-age members of a Smoke Detectives Club teach Count Floyd about fire safety. Extremely well done, entertaining, educational video targeting school age children from kindergarten through 6th grade. Source: State Farm Fire and Casualty Company 1990
15 (A & B)	Africanized Honey Bees	11:00	The Buzz About Killer Bees	This video was specifically designed to give elementary school-aged children important information on bees in a format that is fun, entertaining and non-threatening. Source: San Diego County Department of Agriculture, Weights and Measures and NBC 7/39 San Diego 1997

16	Earthquake	12:00	Earthquake Preparedness in Mobile Home Communities (Video of 35 mm Still Slides with Sound Program)	Shows how to prepare your mobile home for earthquakes. Covers definition of "community preparedness" and organization of a self-help program in your mobile home community. "Community plan" is also explained and includes the roles that need to be filled, information on conducting drills and use of the "block captain" system. Deals with the unique structural hazards of mobile homes. Shows supplies needed and non-structural hazard reduction techniques (how to reduce the hazards in and around your mobile home). Source: American Red Cross/SCEPP
17	Earthquake	60:00	Earthquake Survival	Actress Shelley Duvall moderates a step-by-step approach to surviving an earthquake. Lots of helpful information. Special tips for apartment and condominium safety. Provides instructions on putting together an emergency kit. Source: Hal Freeman, Hollywood Family Entertainment 1987

18	Earthquake	22:50	San Diego Fire Department Earthquake Preparedness - Family Welfare	San Diego Fire Department created the Family Welfare Committee to inform and educate families about earthquake preparedness. Traffic reporter, Monica Zech, narrates the production. Local earthquake specialist, Dr. Philip Kern, gives an overview of the Rose Canyon and Coronado faults. Fire fighters talk about what to do before and after earthquakes. This video is designed for San Diego Fire Department personnel and their families. Emphasis is placed on establishing a Disaster Information Network to assist families after a disaster. Video useful for any emergency response agency. Good information to stimulate need for family preparedness and networking. 1987
19 English: (A, B & C) Spanish: (D & E)	Earthquake	27:00	Make Yourself a Promise <i>(English and Spanish language versions available)</i>	Focuses on how to prepare for the next quake, in your own home and together with your neighbors. Presents preparedness information for elders, frail elders, the disabled and non-English speaking persons. Emphasizes the importance of organizing community centers and neighborhoods to prepare for an earthquake. Source: TODCO/David Brown Production 1990

33	Earthquake	5:30	The Earthquake Threat to Southern California (Video of 35 mm Still Slides with Sound Program)	Geologic (pre-Whittier 1987) information on the earthquake threat to Southern California. Covers what effects can be expected after a major quake. Video contains general information which could be used as a good warm-up for a more in-depth lecture. It is motivational, but does not include information for preparedness techniques and is not a stand-alone presentation. Includes recording of an announcer at radio station KHAR during the shaking of the 1964 Alaska earthquake. Source: Southern California Earthquake Preparedness Project
34	Earthquake	60:00	The Earthquake is Coming	An excellent overview of reasons to prepare for the inevitable major earthquake. Takes the viewer to the Bay Area, Silicon Valley, Coalinga, Parkfield, San Bernardino and shows us why we can expect major structural damage, high injury and long-range economic effect on business and the defense industry. Emphasizes that we have built directly over faults or close to them. Makes one wonder why developers and the public continue to ignore the inevitable. Source: KPBS-Channel 15 Frontline 2/3/87

The San Diego County Office of Disaster Preparedness (ODP) has a video lending library with videos available to the public at no cost. A valid picture ID; current home address; and home and work telephone numbers are required to borrow videos. A maximum of three videos may be borrowed at one time. These videos may be kept for a maximum of five days. Borrowers must come into ODP to check out and return videos. Mailing of videos is not permitted. ODP is located at 5555 Overland Avenue, Building 19, San Diego, in the Kearny Mesa area. The office is situated off of Clairemont Mesa Boulevard between Highway 163 and Highway 15. The office telephone number is (858) 565-3490 and office hours are 8:00 a.m. to 5:00 p.m., Monday through Friday. Borrowers should call the office to check on availability of videos.
